

Vertical Blind System Silent Gliss® 2900

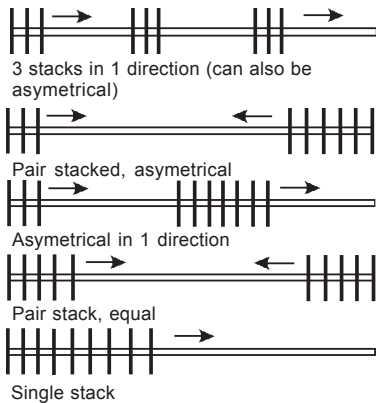

Vertical Blind System Silent Gliss® 2900

Product Information

- Mono control hand operation, purpose-designed for curved and sloping installations
- The only vertical blind system in the world which can be bent to a tight radius, thanks to the unique belt operation
- One robust detachable operating handle is used to both open and close and to tilt the strips
- Systems up to 7m in length, (min. 110cm - pair stack; min. 50cm - single stack)
- Can be safely used with heavy louvres such as PVC and aluminum
- Single or multiple stacking or unequal stacks possible
- Can also be used for sloping windows
- Ceiling fix recommended but can be wall fixed with extension bracket
- Headrail available in silver or white
- 5 year Limited Warranty

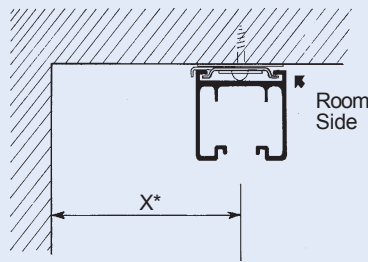

Stacking

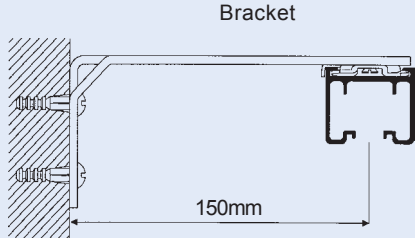

Can be bent
Min. radius R
2901 = 500mm (20")

Installation

Ceiling Mount

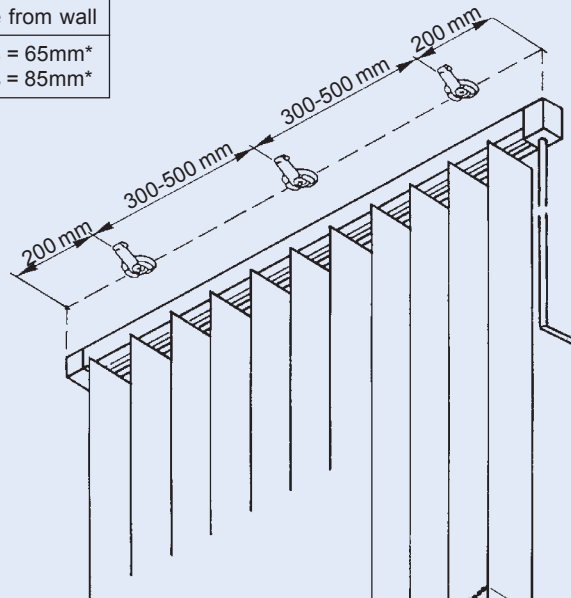

Wall Mount

X Min. distance from wall

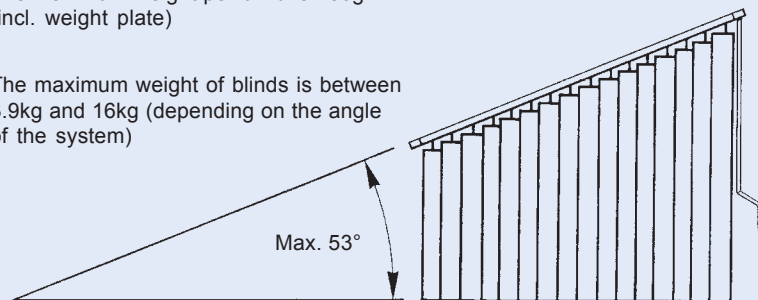

89 mm louvres = 65mm*
127 mm louvres = 85mm*

Sloping Windows

Special longer-necked rotation elements are used

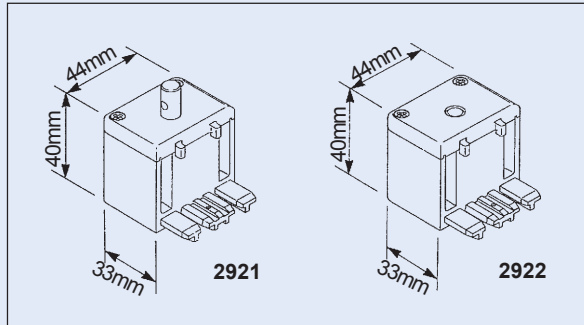

- The maximum slope is 45° (5" / 127mm width of blinds) or 53° respectively (3.5" / 89mm width of blinds)
- The maximum weight per blind is 280gr (incl. weight plate)
- The maximum weight of blinds is between 3.9kg and 16kg (depending on the angle of the system)
